SUMMARY

Product Owner / ICT Business Analyst with experience across AI, pricing, B2B SaaS, legal-tech, OTA, and public-sector digital products. Built and scaled AI-native products from 0 to 1 at Klaussa, growing the platform to 250+ users and institutional partners, and contributed to ML-driven pricing initiatives at tiket.com, one of Indonesia's largest OTAs serving millions of users. Skilled in translating business needs into structured requirements, workflows, user stories, and delivered software solutions with measurable adoption, revenue, and stakeholder impact.

WORK EXPERIENCE

[Klaussa Indonesia](#)

Aug 2025 – Jun 2026

Founder and Principal of Product

- Led user discovery with **lawyers, law students, and legal NGOs**; turned findings into roadmap priorities, grew to **200+ users and corporate partners in 2 months**, and simplified low-adoption features based on feedback
- Defined technical requirements with engineering for **agentic AI workflows, document extraction, rate limiting, multi-tenant data handling, and cost observability**; secured **Rp300M preseed** and joined **Google for AI Startups** plus **NVIDIA Inception**
- Built engineering from **0 to 1** by hiring a **7-person team**, defining the stack, CI/CD culture, delivery rhythm, and cross-functional product execution

[Kalana Consulting](#)

Jan – Jun 2026

Project and Product Lead

- Worked with public-sector and consulting stakeholders to define **problem statements, product scope, business requirements, feasibility narratives, and delivery plans** for government-facing AI pilots
- Advised a game studio on funding readiness by preparing venture capital and government-auditor presentations, aligning product roadmap with budget deployment, and strengthening regulatory and economic feasibility, contributing to **Rp300M in funding**
- Advised a game studio on product strategy by realigning roadmap priorities, refining market sizing, defining vertical-slice requirements, and sharpening narrative positioning, contributing to a **game development competition win**
- Facilitated connections with **Garena, Xbox, Sony, and Tencent**, plus media and community partners, distributors, and publicists

[Superbank](#)

Jan – Mar 2026

Project Management Office · Seasonal (YLI x McKinsey Breakthrough Leadership Project)

- Worked under the **PMO** with mentorship from a **McKinsey Associate**, presenting directly to the **CHRO** and coordinating with HR plus **11 department representatives**
- Conducted **qualitative research** across departments and turned findings into strategy and communications to improve **platform adoption** and reinforce **SuperWays of Working**

[tiket.com](#)

Mar – Sep 2025

Product Management — Pricing · Internship

- Contributed to ML-driven pricing initiatives for insurance and train products at tiket.com, one of Indonesia's largest OTAs serving **millions of users**; wrote EDDs, defined feature specs, aligned data scientists on model selection, tracked success metrics, and delivered **Rp250M/month revenue lift** and **130% internal vertical growth**
- Led a deployed **RL-inspired user segmentation system** using purchase history, price sensitivity, and cross-product transactions to enable customized pricing per user
- Designed a **behavioral economics nudge strategy** with A/B testing, using urgency, social proof, anchoring, and loss-aversion cues to drive earlier purchase
- Defined a **competitor price scraping strategy** that improved OTA comparison data quality, increased coverage by **190%** with a **10% budget increase**, and expanded inventory coverage

LEADERSHIP & RESEARCH EXPERIENCE

[Ragamaya VR](#) — Universitas Indonesia x SMPK St. Ignatius Loyola, Labuan Bajo

Jun 2025 – Jun 2026

Product Owner Lead

- Secured **Rp150,000,000 in research funding** to build a VR learning experience preserving NTT local folklore using Unity and Blender
- Led product discovery and requirement gathering by collecting folklore, running **FGDs**, and translating qualitative insights into feature scope and content priorities
- Planned site visits to a **remote island community**, coordinated local-dialect fieldwork, and built cross-faculty collaboration plus partnerships with **Dinas Pemuda, Pendidikan, dan Olahraga**
- Led roadmap, scope, and delivery decisions, advanced the project from **TRL 4 to TRL 5**, and deployed the VR experience to a frontier school serving **300+ students and teachers**

[Gladiatos Robotics, Universitas Indonesia](#)

Jun 2024 – Jun 2025

Managing Director - Project and IoT Product Manager

- In the **first month of leadership**, restructured the product and technical roadmap and directed execution to get a previously immobile humanoid robot **walking**
- Reorganized team structure, workload allocation, and mentorship coordination with SNUST Korea to stabilize delivery through a **resource-constrained, near-disbanded period**
- Established an iteration-based development rhythm through **9 robocar builds** and competition preparation, leading the team to **Top 16 and Top 8** national finishes

[RISTEK Fasilkom UI](#)

Jan – Dec 2024

Vice Director of Business Growth, Business Growth and Partnerships Student Interest Group · PIC Datathon 2024

- Led partnership development with **10+ institutions**, securing agreements worth over **\$49,000** and managing timelines, deliverables, and stakeholder communication
- Spearheaded academic collaboration between Fasilkom UI, **University of Sussex, and Monash University**
- Scaled Datathon into the **largest student-led data competition in Indonesia**, drawing **800+ participants** from UI, ITB, UGM, Oxford, NTU, NUS, UoFT, and Monash

EDUCATION

Bachelor of Computer Science, Universitas Indonesia - Faculty of Computer Science (Fasilkom UI) - GPA 3.89 / 4.00

Nanyang Technological University, INSPIRASI Summer Program - Sustainability, Smart City, Circular Economy - LPDP Scholar
