SUMMARY

Technical Product Manager with experience across AI, pricing, B2B SaaS, legal-tech, OTA, and public-sector digital products. Launched and grew **AI-native products from 0 to 1 at Klaussa** to **250+ users** and institutional partners, and contributed to **ML-driven pricing initiatives at tiket.com**, one of Indonesia's largest OTAs serving **millions of users**. Strong in translating ambiguous problems into **product strategy, technical requirements, scalable systems, and measurable revenue, adoption, and delivery impact**.

WORK EXPERIENCE

[Klaussa Indonesia](#)

Aug 2025 – Jun 2026

Founder and Principal of Product

- Defined product roadmap and technical requirements for **contract review, legal research, document ingestion, and reporting workflows**, balancing accuracy, privacy, latency, cost, and user adoption constraints.
- Led product and technical scoping for **agentic AI workflows using LangChain and Gemini**, including multi-step contract review, legal research tool-calling, orchestrator/sub-agent flows, and **on-premises deployment** requirements for data privacy.
- Defined document pipeline requirements for processing **300,000+ court decisions, contracts, and regulations**, covering PDF parsing, OCR, custom chunking, retrieval quality, and legal document structure.
- Partnered with engineering to design scalable infrastructure for concurrent usage, including **rate limiting, Redis caching, GCP deployment, PostgreSQL** multi-tenant data handling, CI/CD practices, and **LangFuse cost observability**.

[Kalana Consulting](#)

Jan – Jun 2026

Project and Product Lead

- Led AI and digital product consulting delivery across public-sector and creative-tech initiatives; **Top 5 in AI Incubation for Public Sector** by British Embassy Jakarta x UK-Indonesia Tech Hub.
- Translated public-sector AI opportunities into problem statements, product scope, technical feasibility assumptions, pilot requirements, roadmap options, and stakeholder-facing delivery plans.
- Advised game studios on **technical-product roadmap alignment, vertical-slice requirements, funding readiness**, regulatory feasibility, market sizing, and investor presentation narratives, contributing to **Rp300M in investment/funding secured**.
- Coordinated cross-functional and external stakeholders across government, consulting, game publishing, media, community, and distribution partners to support **product validation, launch planning, and funding narratives**.

[Superbank](#)

Jan – Mar 2026

Project Management Office · Seasonal (YLI x McKinsey Breakthrough Leadership Project)

- Worked under the **PMO** with mentorship from a **McKinsey Associate**, presenting directly to the **CHRO** and coordinating with HR plus **11 department representatives**
- Conducted **qualitative research** across departments and turned findings into strategy and communications to improve **platform adoption** and reinforce **SuperWays of Working**

[tiket.com](#)

Mar – Sep 2025

Product Management — Pricing · Internship

- Contributed to **ML-driven pricing initiatives** for insurance and train products at tiket.com, one of Indonesia's largest OTAs serving **millions of users**; wrote EDDs, defined feature specs, aligned data scientists on model selection, tracked success metrics, and delivered **Rp250M/month revenue lift and 130% internal vertical growth**.
- Led product scoping for an **RL-inspired user segmentation system** using purchase history, price sensitivity, and cross-product transactions to enable customised pricing per user.
- Designed a **behavioral economics nudge strategy** with A/B testing, using urgency, social proof, anchoring, and loss-aversion cues to drive earlier purchase
- Defined a **competitor price scraping strategy** that improved OTA comparison data quality, increased coverage by **190%** with a **10% budget increase**, and expanded inventory coverage

LEADERSHIP & RESEARCH EXPERIENCE

[Ragamaya VR](#) — Universitas Indonesia x SMPK St. Ignatius Loyola, Labuan Bajo

Jun 2025 – Jun 2026

Technical Product Manager Lead

- Secured **Rp150,000,000 in research funding** to build a VR learning experience preserving NTT local folklore using Unity and Blender
- Led product discovery and requirement gathering by collecting folklore, running **FGDs**, and translating qualitative insights into feature scope and content priorities
- Planned site visits to a **remote island community**, coordinated local-dialect fieldwork, and built cross-faculty collaboration plus partnerships with **Dinas Pemuda, Pendidikan, dan Olahraga**
- Led roadmap, scope, and delivery decisions, advanced the project from **TRL 4 to TRL 5**, and deployed the VR experience to a frontier school serving **300+ students and teachers**

[Gladiatos Robotics, Universitas Indonesia](#)

Jun 2024 – Jun 2025

Managing Director - Project and IoT Product Manager

- Restructured the product and technical roadmap in the **first month of leadership**, enabling a previously immobile humanoid robot to walk.
- Reorganized team structure, workload allocation, and mentorship coordination with **SNUST Korea** to stabilize delivery through a **resource-constrained, near-disbanded period**
- Established an iteration-based development rhythm through **9 robocar builds** and competition preparation, leading the team to **Top 16 and Top 8** national finishes

[RISTEK Fasilkom UI](#)

Jan – Dec 2024

Vice Director of Business Growth, Business Growth and Partnerships Student Interest Group · PIC Datathon 2024

- Led partnership development with **10+ institutions**, securing agreements worth over **\$49,000** and managing timelines, deliverables, and stakeholder communication
- Spearheaded academic collaboration between Fasilkom UI, **University of Sussex, and Monash University**
- Scaled Datathon into the **largest student-led data competition in Indonesia**, drawing **800+ participants** from UI, ITB, UGM, Oxford, NTU, NUS, UoFT, and Monash

EDUCATION

Bachelor of Computer Science, Universitas Indonesia - Faculty of Computer Science (Fasilkom UI) - GPA 3.89 / 4.00

Nanyang Technological University, INSPIRASI Summer Program - Sustainability, Smart City, Circular Economy - LPDP Scholar

SKILLS

Technical Product: Roadmaps, Technical Requirements, EDD, PRD, API Collaboration, System Design, Data Pipeline Requirements, Experiment Design, Metrics, OKR

AI / Agentic: LangChain, LangFuse, Gemini, Prompt Engineering, On-premise LLM, LLM Evaluation / RAG, Multi-agent Systems

ML / Data: PyTorch, Scikit-Learn, Pandas, NumPy, BigQuery, RL Simulation, A/B Testing, User Segmentation

Infra: GCP, Docker, PostgreSQL, Redis, CI/CD, Rate Limiting, Caching, Multi-tenant Data Design

Languages: Python, JavaScript, Java, Dart, SQL

Domain: AI Products, Pricing Strategy, Legal-Tech, B2B SaaS, OTA, Public-Sector Digital Products, Robotics

SELECTED ACHIEVEMENTS

[NATL] Gold Medal · GEMASTIK 2024 Software Development (2024) — Won one of Indonesia's most prestigious product and software development competitions, backed by Pusat Prestasi Nasional, after competing against 300+ preliminary teams and 20 finalist teams.

[INTL] Top 5% Worldwide · Startup Wheel 2026 — Ranked among the strongest global startup teams in an international venture and entrepreneurship competition.

[NATL] 1st Winner · Management Exposed, FEB UI (2023) — Finished 1st among 100+ teams in a major management and business competition hosted by FEB UI.

[NATL] Young Leaders for Indonesia — Wave 17 Awardee, McKinsey & Company x YLI Foundation (2025) — Selected for McKinsey-backed leadership development, joining a national cohort of high-potential Indonesian young leaders.

[NATL] Top 5 · AI Incubation for Public Sector — British Embassy x UK-Indonesia Tech Hub (2026) — Reached the top cohort for public-sector AI solutions through Kalana Consulting, recognized by the British Embassy and UK-Indonesia Tech Hub.

[INTL] Top 20 · Microsoft Elevate AI Impact Challenge (2026) — Recognized by Microsoft Elevate for an AI impact proposal focused on practical, scalable technology outcomes.
